

From personal AI to company assets

Your team uses AI more than ever,
but none of it stays with the company.

AI employees work inside your existing tools,
so **how your people work** stays with you.

How it works

1. Create an AI employee

No complex AI rollout —
just chat and a few clicks.

2. Works autonomously

Gets the work done on its own,
inside Slack and Notion.

3. Better with every use

What it learns becomes a company asset, not one person's.

Why DAIOps

✓ Full support · ◐ Partial · ✗ Not supported

	DAIOps	Claude Code	Claude Cowork	Open Claw	Hermes Agent	Notion AI
Works in your existing workflow Non-developers work right inside ERP, Slack, and Notion	✓	✓	✓	✓	✓	🟡
24/7 always on A dedicated AI server with no hardware to buy	✓	✗	✗	🟡	🟡	✓
Improves with use Beyond simple memory — it learns how each person works	✓	✗	✗	🟡	✓	🟡
Enterprise-ready Access control, audit logs, dedicated deployment	✓	🟡	🟡	✗	🟡	✓
On-prem with your own LLM Runs on your servers — no data ever leaves	✓	✗	✗	🟡	🟡	✗

WHY WE'RE HERE

1. Architecture validated with Google engineers

2. Scaling on GCP — multi-region, GPU/TPU

3. Pre-Series A with North American VCs · U.S. entity incorporated

VISION

Beyond automating single tasks — toward an ecosystem where proven workflows accumulate and change hands.

AI anyone can use

Powerful agentic AI in everyday work — no coding required

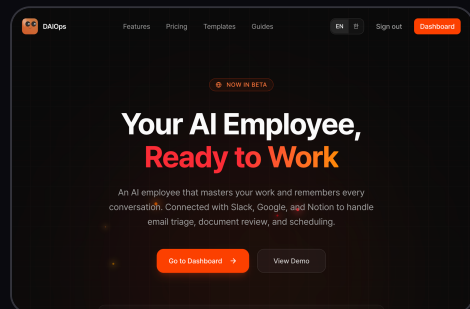

Workflows as platform assets

Proven ways of working are captured, cloned, and reused

Hub & marketplace

Trade proven AI employees and workflows

Closed beta live now

Founded Nov 2024 · Daejeon HQ & R&D · 5-person full-stack team. Proving the model in Korea, then scaling globally in the \$15.2B data-AI platform market (27.1% CAGR).
